

## DESCRIPTION

The [gas heating continuous fixation machine](#) is mainly used for batch production of green tea, oolong tea, herbal tea, Ivan tea, etc.

It has the advantages of controllable temperature, high production efficiency, and low labor costs.

This kind of fixation machine uses gas heating, using three stages of fire platters, the working temperature of each section can be adjusted. Because the tea fixation follows the order from high temperature to low temperature. Therefore, the tea made by this machine is more even, the green color is better, and the aroma is more sufficient.

Automatic solenoid valve design, heating automatically starts and stops, the solenoid valve automatically closes when the temperature reaches the set temperature, and the machine stops heating. When the temperature is lower than the set temperature, the solenoid valve opens and the machine reheat, which can save fuel.

Equipped with a water vapor discharge system to discharge hot and humid exhaust gas from the machine to make the tea color look good and avoid quality degradation.

## ADVANTAGE

1. There are three valves at the bottom, which can be manually ignited in case of power failure, so tea leaves are not wasted.
2. Double ignition needles and fully automatic ignition coils ensure 100% successful ignition and no waste of fuel.
3. Preserve the design of the combustion head of the constant burning flame, reserve the constant burning flame after the ignition is successful, re-ignite from the constant burning flame, reduce the pressure of the ignition needle and the ignition coil, and improve the service life.
4. The inner cylinder adopts 3.5mm thick steel plate to prevent the deformation of the cylinder body at high temperature, the work can store energy, the heat loss is less, the temperature change is smaller, and the energy is more energy-saving.

## APPLICATION

[Heating Continuous Steaming Machine](#) is suitable for processing black / green / oolong / white / dark / herbal tea, the following is the working time required for the above tea production.

Type Of Tea	Working Time
Green Tea	4-6 Minutes
Oolong Tea	4-6 Minutes
Herbal Tea	4-6 Minutes

The above data is for reference only, and the specific processing time shall be determined according to the actual situation.

## SPECIFICATION

力。1588097

## Continuous Tea Fixing Machine DL-6CSTL-Q100

Voltage: 380V 50HZ  
Heating Type: Gas

Barrel Diameter: 100 cm  
Barrel Length : 480 cm  
For Green/Oolong Tea

Gas(LPG/LNG) Heating  
Capacity 400 kg / h  
5 mm Steel Board

L:650cm W:142cm H:281cm

[Heating Continuous Steaming Machine](#) specification list:

Model		DL-6CSTL-Q100
Dimension		1420×6500×2810 mm
Voltage		380/50 V/Hz
Drum inner diameter		1000 mm
Drum inner length		4800 mm
Drive motor	Power	4 KW
	Speed	1400 rpm
	Voltage	380 V
Air exhausting motor	Power	370 W
	Speed	1400
	Voltage	380 V

Drum speed	5-37 min
Heating type	Gas
Efficiency	400 kg/h

Specification of all of Gas [Heating Continuous Steaming Machine](#).

Model	6CSTL-Q80	6CSTL-Q100
Drum Diameter	80 cm	100 cm
Drum Length	400 cm	480 cm
Capacity	200 kg/h	400 kg/h

If you have special need, it can be customized according to the needs of customers.
