

DESCRIPTION

This [Rotating Tea Drying Machine](#) has 16 sieve trays, the diameter of each tray is 90 cm, total drying area of 10m². It can process 27-36 kg of wet tea per batch.

A new type of environmentally friendly high-temperature heat-resistant insulation material, with a thickness of 3 cm, and completely covering the machine to ensure that no heat is wasted and 30% energy saving. The door is lined with high-temperature resistant elastic rubber strips, which can seal the door of the machine to prevent hot air from escaping.

Using high-strength steel hinges and door handles, the service life of the machine is increased by 40% compared with other companies, The drying machine use of stainless steel sieve trays will not produce harmful substances, ensuring the cleanliness of tea production

ADVANTAGE

1. Rotary drying design, the tea leaves are heated evenly and drying more quickly.
2. More than 50% of the whole machine adopts modular design, shorter production time for batch orders, and easier replacement of parts.
3. The patented air duct design allows the bottom of each sieve tray to enter the air, which quickly removes the moisture in the tea and improves the drying efficiency.
4. The machine with strong exhaust air has a quick moisture exhaust outlet, and the air outlet is opened at the beginning of drying to allow moisture to be discharged faster and improve production efficiency.

APPLICATION

[Small Tea Drying Machine](#) is suitable for processing black / green / oolong / white / dark / herbal tea, the following is the working time required for the above tea production.

Type Of Tea	Temperature	Working Time
Black Tea	80-120°C	20-60 Minutes
Green Tea	80-120°C	20-60 Minutes
White Tea	80-120°C	20-60 Minutes
Oolong Tea	80-120°C	20-60 Minutes
Herbal Tea	80-120°C	20-60 Minutes

The above data is for reference only, and the specific processing time shall be determined according to the actual situation.
