

DESCRIPTION

DL-6CRT-75 tea rolling machine has double action, mainly for tea twisting, drum diameter 75cm, capacity about 120 kg per batch.

The surface of the disk is in one run pressed from stainless steel plate to make the panel and the joists become an integral, which decreases the breaking ratio of tea and increases its striping ratio.

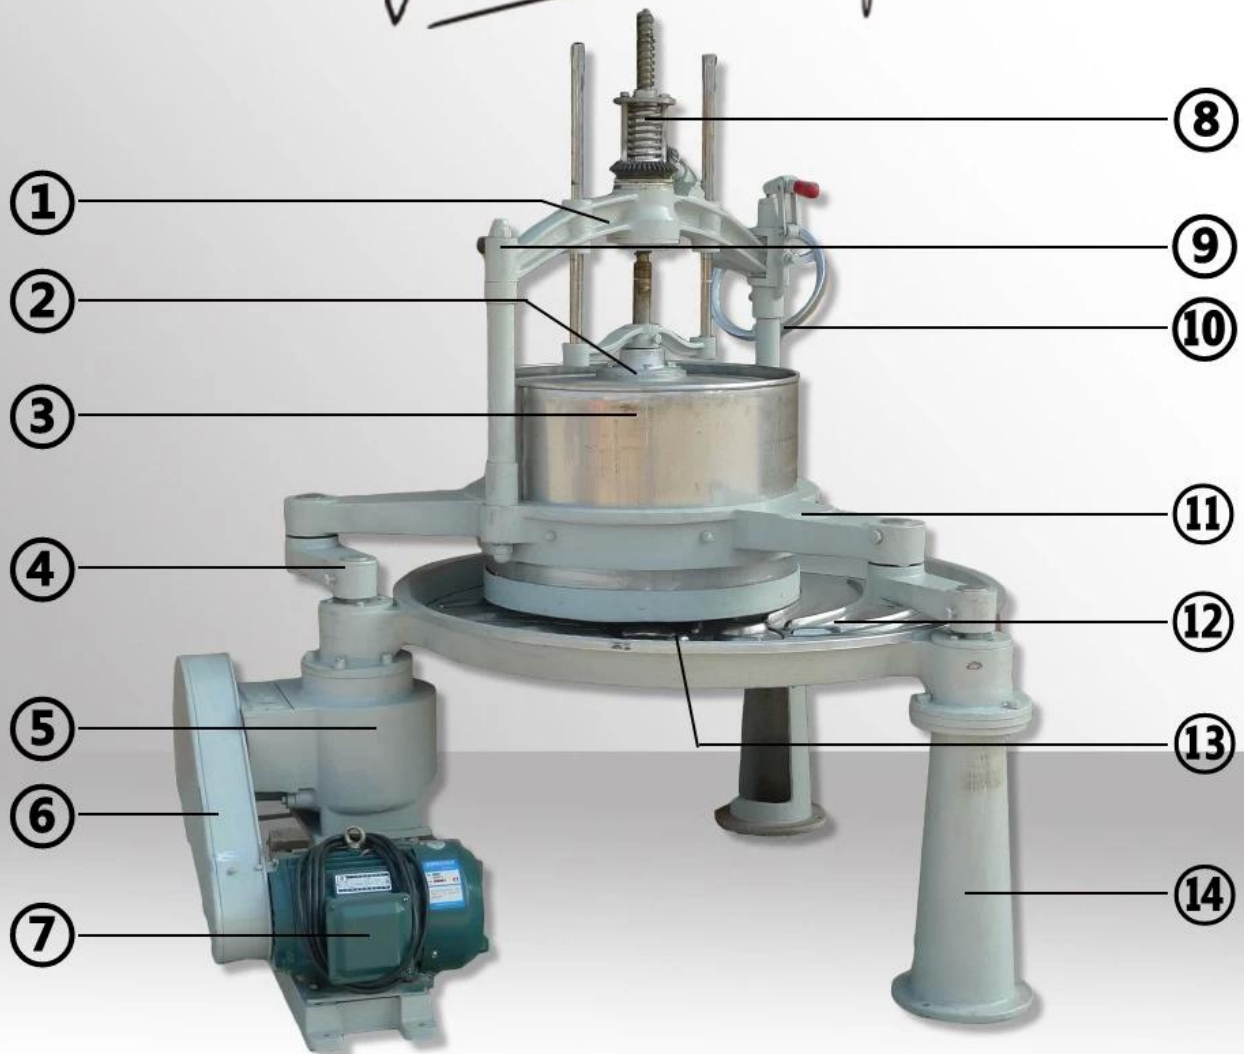

The kneading machine uses worm gears, and the kneading drum is driven through mechanical-connected parts. The centrifugal movement in the fixing disk built with joists makes the tea in the kneading drum suffer from the kneading action generated between the upper gland and the joists of the lower fixing disk. The kneading degree of the tea can be adjusted by regulating the pressure of the gland.

ADVANTAGE

1. Turbine worm gearbox design, deceleration is stable and durable.
2. The bottom discharge handle design, gently push the handle, the tea can fall easily.
3. The heightened design of the rolling barrel can prevent the tea leaves from falling.
4. The supporting part of the machine is made of cast iron, which is strong and durable.
5. The arc of the rolling bar has been improved for decades, and the optimal design has been obtained. The efficiency of tea leaves been the strip-type is increased by 30%.

⑦	Drive motor	□	Support leg

APPLICATION

Tea Twisting Machine is suitable for processing black / green / oolong / white / dark / herbal tea, the following is the working time required for the above tea production.

Type Of Tea	Working Time
Black Tea	30-90 minutes
Green Tea	4-6 minutes
Oolong Tea	4-6 minutes
Herbal Tea	4-6 minutes

The above data is for reference only, and the specific processing time shall be determined according to the actual situation.

SPECIFICATION

[Tea Twisting Machine](#) specification list:

Model		DL-6CRT-75
Dimension		2050*1670*2050 mm
Input voltage		380V / 50Hz
Tea disc diameter		1310 mm
Barrel diameter		750 mm
Barrel height		580 mm
Matching motor	Power	4 kW
	Speed	1430 RPM
	Rated voltage	380 V
Barrel speed		35 RPM
Weight		1075 Kg
Max capacity per batch		120 kg/batch
Capacity for green tea		120-1200 kg/h
Capacity for black tea		120-240 kg/h

Specification of all of [Tea Rolling Table Machine](#).

Model	Barrel Diameter	Barrel Height	Capacity
6CRT-25	25 cm	18 cm	3 kg/batch
6CRT-30	30 cm	21 cm	5 kg/batch
6CRT-35	35 cm	26 cm	8 kg/batch
6CRT-40	40 cm	25 cm	11 kg/batch
6CRT-45	45 cm	28 cm	15 kg/batch
6CRT-50	50 cm	28 cm	20 kg/batch
6CRT-55	55 cm	40 cm	35 kg/batch
6CRT-65	65 cm	48 cm	60 kg/batch

If you have special need, it can be customized according to the needs of customers.

DETAILS

The distance between the rolling barrel and the rolling disc of each machine is different to ensure that each machine can make the best quality tea.

The supporting part of the machine is made of cast iron, which is strong and durable.

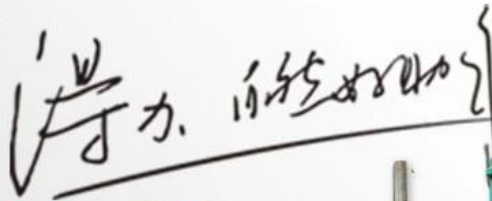

The double arms adopt a double-arm open cover structure, which has a strong bearing capacity and stable operation.

The unique design of rolling disc and rolling bar inclination angle, the speed is increased by 30% compared with other companies.

PHOTOS

A large industrial machine, likely a rubber roller or press, with a green frame and a large silver cylindrical roller. It features a hand crank on the left and a motor unit on the right. The machine is mounted on a sturdy green base. The roller is positioned horizontally and is surrounded by a green frame. A hand crank is attached to the left side of the frame, and a motor unit is attached to the right side. The machine is designed for processing rubber sheets.

For All Kind Tea
