

DESCRIPTION

Tea rolling machine can use for most of tea such as black tea, green tea, and oolong tea, for green tea (non-fermented) is mainly used for shaping the strip type, for black tea (fermented tea) is mainly used to destroy the cells of fresh tea leaves, so that the juice in tea can flow out and facilitate subsequent fermentation.

Through the external force of the tea roller machine, the tea leaf's juice overflows, the tea cells are damaged, fresh tea leaf is twisted and curled into a strip shape, the juice in the fresh tea leaves is squeezed out. When brewing, the taste is stronger, the color of the tea soup is brighter and the quality of the tea is better.

ADVANTAGE

1. Turbine worm gearbox design, deceleration is stable and durable.
2. The bottom discharge handle design, gently push the handle, the tea can fall easily.
3. The heightened design of the rolling barrel can prevent the tea leaves from falling.
4. The supporting part of the machine is made of cast iron, which is strong and durable.
5. The arc of the rolling bar has been improved for decades, and the optimal design has been obtained. The efficiency of tea leaves been the strip-type is increased by 30%.
